Mark Bowen

**Censoring Science: Dr. James Hansen and the Truth of Global Warming** Mark Bowen

**The dramatic story of global warming, politics, and the scientist Al Gore calls "the most powerful and consistent voice calling for intelligent action to preserve our planet's environment."**

*Censoring Science* is the gripping story of the world's preeminent climatologist, Dr. James Hansen, the "pivotal character in the greatest and most politically charged science story of our time" (*New Scientist*). NASA's leading climate expert, Dr. Hansen, first broke the international news on global warming at a Senate hearing in 1988. Little did he expect the rising storm of politically motivated resistance, denial, and obstruction.

Revealing the extent of the Bush administration's censorship of Dr. Hansen's findings, *Censoring Science* sets the record straight with solid scientific facts such as: the eight hottest years on record have occurred in the last decade, and ice is melting at record rates all around the planet. Dr. Hansen shows how we can still prevent environmental disaster if the country and the government are willing to face the truth about global warming.
