De l'Origine des espèces (Annoté) (French Edition) Charles Darwin

L'Origine des espèces par le moyen de la sélection naturelle, ou la préservation des races favorisées dans la lutte pour la vie (Titre anglais original : On the Origin of Species by Means of Natural Selection, or the Preservation of Favoured Races in the Struggle for Life) est un ouvrage de Charles Darwin, publié le 24 novembre 1859 et dans lequel il explique le mécanisme présidant, selon lui, à l'évolution graduelle des espèces vivantes dans la nature.

En dépit de son titre, cet ouvrage est considéré aujourd'hui comme fondateur de la théorie de l'évolution moderne. Darwin mentionne différents prédécesseurs, à la fois concernant l'idée de "descendance avec modification" et l'idée de sélection naturelle dans une Notice historique ajoutée à partir de la troisième édition.
