Exactly Solvable Models of Biological Invasion (Chapman & Hall/CRC Mathematical and Computational Biology) Sergei V. Petrovskii, Bai-Lian Li

Much of our current knowledge on biological invasion was derived from field studies, but many recent advances relied heavily on mathematics and computing, particularly mathematical modeling. While numerical simulations are clearly a useful approach, they have some serious drawbacks. Approximations errors and the number of parameter values can have a significant impact on the simulation results, the extent of which often remains obscure. Such difficulties do not arise, however, when the problem can be solved analytically.

Exactly Solvable Models of Biological Invasion demonstrates the advantages and methods of obtaining exact solutions of partial differential equations that describe nonlinear problems encountered in the study of invasive species spread. With emphasis on PDEs of diffusion-reaction type, the authors present a comprehensive collection of exactly solvable models and a unified, self-contained description of the relevant mathematical methods. In doing so, they also provide new insight into important issues such as the impact of the Allee effect, the impact of predation, and the interplay between different modes of species dispersal. Full calculation details make this presentation accessible to biologists as well as applied mathematicians, and a range of ecological examples and applications demonstrate the utility of exact methods in practice.

Exact solutions provide an immediate, complete description of system dynamics for a wide class of initial conditions and serve as a convenient tool for testing numerical algorithms and codes used in more specialized studies. This book lays the groundwork for bringing the power of exactly solvable models to bear on real-world ecological problems.

From reader reviews:

Ralph Garibay:

Book is definitely written, printed, or descriptive for everything. You can learn everything you want by a reserve. Book has a different type. As it is known to us that book is important factor to bring us around the world. Next to that you can your reading skill was fluently. A e-book Exactly Solvable Models of Biological Invasion (Chapman & Hall/CRC Mathematical and Computational Biology) will make you to always be smarter. You can feel more confidence if you can know about every thing. But some of you think that open or reading a book make you bored. It is far from make you fun. Why they might be thought like that? Have you seeking best book or appropriate book with you?

Nannie Hand:

This Exactly Solvable Models of Biological Invasion (Chapman & Hall/CRC Mathematical and Computational Biology) are reliable for you who want to be described as a successful person, why. The reason of this Exactly Solvable Models of Biological Invasion (Chapman & Hall/CRC Mathematical and Computational Biology) can be one of many great books you must have will be giving you more than just simple reading through food but feed anyone with information that might be will shock your earlier knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed kinds. Beside that this Exactly Solvable Models of Biological Invasion (Chapman & Hall/CRC Mathematical and Computational Biology) forcing you to have an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we understand it useful in your day pastime. So , let's have it and luxuriate in reading.

Darren Billups:

The book Exactly Solvable Models of Biological Invasion (Chapman & Hall/CRC Mathematical and Computational Biology) will bring that you the new experience of reading a book. The author style to elucidate the idea is very unique. In the event you try to find new book to see, this book very appropriate to you. The book Exactly Solvable Models of Biological Invasion (Chapman & Hall/CRC Mathematical and Computational Biology) is much recommended to you you just read. You can also get the e-book through the official web site, so you can quicker to read the book.

Scott Hicks:

A lot of reserve has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the most effective book for you, science, comic, novel, or whatever simply by searching from it. It is called of book Exactly Solvable Models of Biological Invasion (Chapman & Hall/CRC Mathematical and Computational Biology). You'll be able to your knowledge by it. Without leaving the printed book, it could possibly add your knowledge and make an individual happier to read. It is most essential that, you must aware about reserve. It can bring you from one location to other place.
