The main focus of "Single- and Multi-Carrier MIMO Transmission for Broadband Wireless Systems" is to provide the basic understanding of the underlying techniques related to PHY-MAC design of future wireless systems. It includes basic concepts related to single- and multi-carrier transmissions together with MIMO techniques. Discussions related to different recent standards that use single- and multi-carrier transmissions are also explained. "Single- and Multi-Carrier MIMO Transmission for Broadband Wireless Systems" provides a comprehensive and holistic approach to the variety of technical solutions. Future system design would require these different technologies to work together, and not independently. Therefore, it is very important to analyze the effects and gains when they are put together in a unified platform. This is the prime focus of this book. Moreover, the authors include recent research results which are not yet published in another form. The book is intended to be used for lectures in graduate level courses at universities. PhD level students should also find it useful as this book will outline the fundamental concepts and design methods for PHY and MAC layers of future wireless systems. This book can also be used as a reference by engineers and developers in the industry as well as by researchers in academia. For professionals, system architects and managers who play a key role in the selection of a baseline system concept for future wireless standards, such as IMT-Advanced type architecture, the authors will include discussions, analysis and guidelines to highlight overall system level perspective.

From reader reviews:

James Sandifer:

In this 21st hundred years, people become competitive in most way. By being competitive right now, people have do something to make all of them survives, being in the middle of the crowded place and notice by surrounding. One thing that at times many people have underestimated that for a while is reading. That's why, by reading a guide your ability to survive enhance then having chance to endure than other is high. For you who want to start reading any book, we give you that Single- And Multi-Carrier Mimo Transmission for Broadband Wireless Systems (River Publishers Series in Communications) book as nice and daily reading publication. Why, because this book is greater than just a book.

Jennifer Stewart:

The publication with title Single- And Multi-Carrier Mimo Transmission for Broadband Wireless Systems (River Publishers Series in Communications) has lot of information that you can learn it. You can get a lot of profit after read this book. This particular book exist new understanding the information that exist in this book represented the condition of the world at this point. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you within new era of the internationalization. Then we request again, what kind of activity do you possess when the spare time coming to you actually of course your answer may unlimited right. Then do you try this one, reading guides. It can be your alternative within spending your spare time, the actual book you have read is definitely Single- And Multi-Carrier Mimo Transmission for Broadband Wireless Systems (River Publishers Series in Communications).

Pandora Rice:

Some people said that they feel uninterested when they reading a book. They are directly felt it when they get a half areas of the book. You can choose typically the book Single- And Multi-Carrier Mimo Transmission for Broadband Wireless Systems (River Publishers Series in Communications) to make your own personal reading is interesting. Your skill of reading skill is developing when you just like reading. Try to choose basic book to make you enjoy to study it and mingle the impression about book and looking at especially. It is to be 1st opinion for you to like to open up a book and examine it. Beside that the reserve Single- And Multi-Carrier Mimo Transmission for Broadband Wireless Systems (River Publishers Series in Communications) can to be your brand-new friend when you're feel alone and confuse in what must you're

doing of this time.
