Marine Mammal Physiology: Requisites for Ocean Living (CRC Marine Biology Series)

Marine Mammal Physiology: Requisites for Ocean Living (CRC Marine Biology Series)

Suppose you were designing a marine mammal. What would you need to think about to allow it to live in the ocean? How would you keep it warm? What would you design to allow it to dive for very long periods to extreme depths? Where would it find water to drink? How would you minimize the cost of swimming, and how would it find its prey in the deep and dark? These questions and more are examined in detail throughout this book.

Marine Mammal Physiology: Requisites for Ocean Living is the first textbook focused on how marine mammals live in the sea from a physiological point of view. It explores the essential aspects of what makes a marine mammal different from terrestrial mammals, beyond just their environment. Unlike many publications and books that cover these species from almost all perspectives, this textbook takes a step back to focus on the physiological and biochemical characteristics that have allowed these mammals as a group to exploit effectively the marine environment that is so hostile to humans.

The chapter topics are grouped into major themes: diving and locomotion, nutrition and energetics, reproduction, sensory systems, and environmental interactions. Each chapter is arranged around a common perspective and theme: the big picture challenge and summary and what is known specifically by order. To aid you even further, the authors include a "Toolbox" section in each chapter where they discuss the newest methods for understanding and working on the physiology of marine mammals.

From reader reviews:

Alice Ybarra:

Within other case, little persons like to read book Marine Mammal Physiology: Requisites for Ocean Living (CRC Marine Biology Series). You can choose the best book if you'd prefer reading a book. Providing we know about how is important a new book Marine Mammal Physiology: Requisites for Ocean Living (CRC Marine Biology Series). You can add information and of course you can around the world by a book. Absolutely right, mainly because from book you can recognize everything! From your country until finally foreign or abroad you can be known. About simple thing until wonderful thing you could know that. In this era, we could open a book as well as searching by internet product. It is called e-book. You should use it when you feel bored to go to the library. Let's read.

Patrick Myers:

Do you have something that you like such as book? The book lovers usually prefer to opt for book like comic, short story and the biggest an example may be novel. Now, why not seeking Marine Mammal Physiology: Requisites for Ocean Living (CRC Marine Biology Series) that give your satisfaction preference will be satisfied by means of reading this book. Reading behavior all over the world can be said as the means for people to know world far better then how they react in the direction of the world. It can't be stated constantly that reading addiction only for the geeky person but for all of you who wants to possibly be success person. So , for all of you who want to start looking at as your good habit, you could pick Marine Mammal Physiology: Requisites for Ocean Living (CRC Marine Biology Series) become your starter.

Sonia Cancel:

Your reading 6th sense will not betray anyone, why because this Marine Mammal Physiology: Requisites for Ocean Living (CRC Marine Biology Series) reserve written by well-known writer whose to say well how to make book which might be understand by anyone who read the book. Written inside good manner for you, dripping every ideas and producing skill only for eliminate your hunger then you still question Marine Mammal Physiology: Requisites for Ocean Living (CRC Marine Biology Series) as good book not merely by the cover but also from the content. This is one book that can break don't evaluate book by its include, so do you still needing an additional sixth sense to pick this specific!?! Oh come on your reading through sixth sense already told you so why you have to listening to yet another sixth sense.

Ann Goddard:

You could spend your free time you just read this book this publication. This Marine Mammal Physiology: Requisites for Ocean Living (CRC Marine Biology Series) is simple to bring you can read it in the park, in the beach, train and also soon. If you did not possess much space to bring the actual printed book, you can buy the e-book. It is make you much easier to read it. You can save the actual book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
