The Learning Society Revisited

The Learning Society Revisited

Torsten Husén has brought together in this volume a collection of his own essays, the topics of which reflect his long and distinguished career both as an academic and as a practical researcher. The essays are grouped under six main themes on which he has worked over the years: research and policy making; educational reforms; equality and meritocracy; the impact of education on career; international and comparative dimensions; and present trends and future perspectives. An underlying message running throughout the volume is the importance of examining educational problems from a wide social perspective, rather than solely from the narrow confines of the classroom.
