Hasso Plattner

A Course in In-Memory Data Management: The Inner Mechanics of In-Memory Databases Hasso Plattner

Recent achievements in hardware and software development, such as multi-core CPUs and DRAM capacities of multiple terabytes per server, enabled the introduction of a revolutionary technology: in-memory data management. This technology supports the flexible and extremely fast analysis of massive amounts of enterprise data. Professor Hasso Plattner and his research group at the Hasso Plattner Institute in Potsdam, Germany, have been investigating and teaching the corresponding concepts and their adoption in the software industry for years.

This book is based on the first online course on the openHPI e-learning platform, which was launched in autumn 2012 with more than 13,000 learners. The book is designed for students of computer science, software engineering, and IT related subjects. However, it addresses business experts, decision makers, software developers, technology experts, and IT analysts alike. Plattner and his group focus on exploring the inner mechanics of a column-oriented dictionary-encoded in-memory database. Covered topics include - amongst others - physical data storage and access, basic database operators, compression mechanisms, and parallel join algorithms. Beyond that, implications for future enterprise applications and their development are discussed. Readers are lead to understand the radical differences and advantages of the new technology over traditional row-oriented disk-based databases.

From reader reviews:

Norberto Brody:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite reserve and reading a guide. Beside you can solve your problem; you can add your knowledge by the guide entitled A Course in In-Memory Data Management: The Inner Mechanics of In-Memory Databases. Try to the actual book A Course in In-Memory Data Management: The Inner Mechanics of In-Memory Databases as your pal. It means that it can to get your friend when you truly feel alone and beside that course make you smarter than in the past. Yeah, it is very fortunated for you personally. The book makes you much more confidence because you can know almost everything by the book. So , let us make new experience and also knowledge with this book.

Judy Chisolm:

Do you certainly one of people who can't read gratifying if the sentence chained within the straightway, hold on guys that aren't like that. This A Course in In-Memory Data Management: The Inner Mechanics of In-Memory Databases book is readable simply by you who hate those straight word style. You will find the facts here are arrange for enjoyable studying experience without leaving actually decrease the knowledge that want to offer to you. The writer involving A Course in In-Memory Data Management: The Inner Mechanics of In-Memory Databases content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the content material but it just different in the form of it. So , do you nonetheless thinking A Course in In-Memory Data Management: The Inner Mechanics of In-Memory Databases is not loveable to be your top checklist reading book?

Amy Quist:

The book with title A Course in In-Memory Data Management: The Inner Mechanics of In-Memory Databases possesses a lot of information that you can discover it. You can get a lot of advantage after read this book. That book exist new information the information that exist in this guide represented the condition of the world currently. That is important to yo7u to understand how the improvement of the world. This book will bring you within new era of the the positive effect. You can read the e-book on your smart phone, so you can read that anywhere you want.

Josephine Draughn:

Are you kind of stressful person, only have 10 as well as 15 minute in your moment to upgrading your mind expertise or thinking skill also analytical thinking? Then you are experiencing problem with the book than can satisfy your limited time to read it because this time you only find reserve that need more time to be examine. A Course in In-Memory Data Management: The Inner Mechanics of In-Memory Databases can be your answer as it can be read by you actually who have those short free time problems.
