HPC@Green IT: Green High Performance Computing Methods

Ralf Gruber, Vincent Keller

HPC@Green IT: Green High Performance Computing Methods Ralf Gruber, Vincent Keller

Making the most efficient use of computer systems has rapidly become a leading topic of interest for the computer industry and its customers alike. However, the focus of these discussions is often on single, isolated, and specific architectural and technological improvements for power reduction and conservation, while ignoring the fact that power efficiency as a ratio of performance to power consumption is equally influenced by performance improvements and architectural power reduction. Furthermore, efficiency can be influenced on all levels of today's system hierarchies from single cores all the way to distributed Grid environments. To improve execution and power efficiency requires progress in such diverse fields as program optimization, optimization of program scheduling, and power reduction of idling system components for all levels of the system hierarchy. Improving computer system efficiency requires improving system performance and reducing system power consumption. To research and reach reasonable conclusions about system performance we need to not only understand the architectures of our computer systems and the available array of code transformations for performance optimizations, but we also need to be able to express this understanding in performance models good enough to guide decisions about code optimizations for specific systems. This understanding is necessary on all levels of the system hierarchy from single cores to nodes to full high performance computing (HPC) systems, and eventually to Grid environments with multiple systems and resources.

From reader reviews:

Rosa Flint:

This book entitled HPC@Green IT: Green High Performance Computing Methods to be one of several books this best seller in this year, that is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy this particular book in the book retail store or you can order it by way of online. The publisher in this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Mobile phone. So there is no reason to your account to past this reserve from your list.

David McCabe:

Reading a guide tends to be new life style within this era globalization. With looking at you can get a lot of information that could give you benefit in your life. Having book everyone in this world can easily share their idea. Guides can also inspire a lot of people. Lots of author can inspire their reader with their story or their experience. Not only the storyline that share in the guides. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors on this planet always try to improve their skill in writing, they also doing some study before they write to their book. One of them is this HPC@Green IT: Green High Performance Computing Methods.

Richard Lamm:

Often the book HPC@Green IT: Green High Performance Computing Methods has a lot details on it. So when you check out this book you can get a lot of help. The book was authored by the very famous author. This articles author makes some research previous to write this book. This kind of book very easy to read you may get the point easily after scanning this book.

Ronald Sadowski:

Reading can called thoughts hangout, why? Because if you find yourself reading a book specially book entitled HPC@Green IT: Green High Performance Computing Methods your brain will drift away trough every dimension, wandering in each aspect that maybe unfamiliar for but surely will end up your mind friends. Imaging each word written in a reserve then become one form conclusion and explanation in which maybe you never get ahead of. The HPC@Green IT: Green High Performance Computing Methods giving you a different experience more than blown away your head but also giving you useful info for your better life with this era. So now let us present to you the relaxing pattern is your body and mind will probably be pleased when you are finished examining it, like winning a. Do you want to try this extraordinary shelling out spare time activity?
