## **Digital Cinematography** Paul Wheeler

High end digital cinematography can truly challenge the film camera in many of the technical, artistic and emotional aspects of what we think of as 'cinematography'. This book is a guide for practising and aspiring cinematographers and DOPs to digital cinematography essentials - from how to use the cameras to the rapidly emerging world of High Definition cinematography and 24p technology.

This book covers the `on-the-set' knowledge you need to know - its emphasis lies in practical application, rather than descriptions of technologies, so that in this book you will find usable `tools' and information to help you get the job done. From `getting the look' to lighting styles and ratios, what is needed for different types of shoots and the technical preparation required, this is a complete reference to the knowledge and skills required to shoot high end digital films. The book also features a guide to the Sony DVW in-camera menus - showing how to set them up and how they work - a device to save you time and frustration on set.

Paul Wheeler is a renowned cinematographer/director of photography and trainer, he runs courses on Digital Cinematography at the National Film & Television School and has lectured on the Royal College of Art's MA course and at The London International Film School. He has been twice nominated by BAFTA for a Best Cinematography award and also twice been the winner of the INDIE award for Best Digital Cinematography.
