Biomolecular Structure and Function

Biomolecular Structure and Function

Biomolecular Structure and Function covers the proceedings of the 1977 'Cellular Function and Molecular Structure: Biophysical Approaches to Biological Problems' symposium. It summarizes the application of several biophysical techniques to molecular research in biology.

This book starts by describing the use of deuterium-labeled lipids, as monitors of the degree of organization of membrane lipids. It also describes the use of carbon-13-labeled lipids, as indicators of molecular mobility. It explains the lipid-protein interactions involving two integral membrane proteins, mitochondrial cytochrome oxidase and calcium-dependent ATPase of muscle sarcoplasmic reticulum. The book goes on to present NMR studies on the organization and conformation of phospholipids, chloroplast membranes, and erythrocyte membranes. It also presents the ESR study of spectrin-phospholipid associations. It discusses the use of fluorescence probes, electrokinetics, neutron diffraction and ion theory studies of phospholipid-protein association, hormone disease, and senescence effects on prokaryotic and eukaryotic cells.

Moreover, this book presents the experiments and phosphorus-31 NMR methodology to simultaneously monitor the intracellular pH and phosphate metabolism in a beating heart, functioning kidney, or an intact living microorganism. This book then describes physical probing of intracellular fluidity and structural changes attending tissue or cell cycles. It also relates relatively narrow lines in the hydrogen-1 NMR spectrum of the extremely viscous complex of the muscle protein troponin and highly polymerized tropomyosin. Structure-function studies of fibrous proteins, such as collagen, actin, and myosin, and active site analysis of enzymes are also presented. Finally, a wide variety of methodologies and technologies is exemplified. This includes proton, carbon, fluorine, phosphorus, and lithium NMR spectroscopy; spin labeling and EPR spectroscopy; chemical studies; light scattering and fluorescence; and electron microscopy.

From reader reviews:

James Goodman:

Do you have favorite book? If you have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each guide has different aim as well as goal; it means that publication has different type. Some people sense enjoy to spend their time for you to read a book. They may be reading whatever they have because their hobby will be reading a book. Think about the person who don't like examining a book? Sometime, man feel need book after they found difficult problem or perhaps exercise. Well, probably you should have this Biomolecular Structure and Function.

Austin Lawrence:

This Biomolecular Structure and Function are usually reliable for you who want to certainly be a successful person, why. The reason of this Biomolecular Structure and Function can be one of several great books you must have is actually giving you more than just simple reading through food but feed you actually with information that maybe will shock your prior knowledge. This book is usually handy, you can bring it all over the place and whenever your conditions throughout the e-book and printed kinds. Beside that this Biomolecular Structure and Function forcing you to have an enormous of experience for example rich vocabulary, giving you trial run of critical thinking that we realize it useful in your day task. So , let's have it and revel in reading.

Howard Benedict:

The book with title Biomolecular Structure and Function has lot of information that you can discover it. You can get a lot of help after read this book. That book exist new knowledge the information that exist in this guide represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you with new era of the internationalization. You can read the e-book with your smart phone, so you can read the idea anywhere you want.

Scott Lowe:

A lot of reserve has printed but it is unique. You can get it by internet on social media. You can choose the best book for you, science, comic, novel, or whatever by simply searching from it. It is referred to as of book Biomolecular Structure and Function. Contain your knowledge by it. Without causing the printed book, it could add your knowledge and make a person happier to read. It is most crucial that, you must aware about publication. It can bring you from one location to other place.
