Fish Immunology

Margaret Manning

Fish Immunology Margaret Manning

Fish Immunology contains the proceedings of a symposium organized by the Fisheries Society of the British Isles, held in Plymouth, England, 11-13 July 1983. This volume contains 29 chapters and opens with a study on the prevention of disease outbreak or treatment of disease in fish farms with drugs or chemicals. Separate chapters follow on topics such as immune phenomena in Teleostei or Anura; phagocytosis in fish; the granulocytes of three elasmobranch species, namely *Scyliorhinus canicula*, *Raja clavata* and *R. microcellata*; and phagocytic cells in the dogfish (*Scyliorhinus canicula* L.); and levels of α -precipitin in two groups of wild fish: a group believed to be suffering from Ulcerative Dermal Necrosis (UDN) and a healthy group showing no external evidence of disease. Subsequent chapters deal with sequential antigenic competition in teleosts challenged with the fish-furunculosis bacterium *Aeromonas salmonicida*; the occurrence of vaccine uptake at the skin surface of rainbow trout; and vaccination and development of immunological memory in carp.

From reader reviews:

Mary Crouch:

As people who live in the particular modest era should be update about what going on or information even knowledge to make these individuals keep up with the era and that is always change and move ahead. Some of you maybe will probably update themselves by examining books. It is a good choice for yourself but the problems coming to an individual is you don't know which you should start with. This Fish Immunology is our recommendation to make you keep up with the world. Why, because book serves what you want and need in this era.

Barbara McGowan:

Often the book Fish Immunology will bring someone to the new experience of reading the book. The author style to describe the idea is very unique. Should you try to find new book to learn, this book very ideal to you. The book Fish Immunology is much recommended to you to study. You can also get the e-book in the official web site, so you can more easily to read the book.

Heidi Crenshaw:

Precisely why? Because this Fish Immunology is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will distress you with the secret this inside. Reading this book next to it was fantastic author who all write the book in such amazing way makes the content within easier to understand, entertaining way but still convey the meaning fully. So , it is good for you for not hesitating having this any more or you going to regret it. This excellent book will give you a lot of benefits than the other book have such as help improving your expertise and your critical thinking way. So , still want to delay having that book? If I had been you I will go to the reserve store hurriedly.

William Luke:

Are you kind of active person, only have 10 or even 15 minute in your day to upgrading your mind proficiency or thinking skill possibly analytical thinking? Then you are experiencing problem with the book than can satisfy your short time to read it because this all time you only find publication that need more time to be go through. Fish Immunology can be your answer given it can be read by anyone who have those short free time problems.
