## Fluvial Remote Sensing for Science and Management

This book offers a comprehensive overview of progress in the general area of fluvial remote sensing with a specific focus on its potential contribution to river management. The book highlights a range of challenging issues by considering a range of spatial and temporal scales with perspectives from a variety of disciplines. The book starts with an overview of the technical progress leading to new management applications for a range of field contexts and spatial scales. Topics include colour imagery, multi-spectral and hyper-spectral imagery, video, photogrammetry and LiDAR. The book then discusses management applications such as targeted, network scale, planning, land-use change modelling at catchment scales, characterisation of channel reaches (riparian vegetation, geomorphic features) in both spatial and temporal dimensions, fish habitat assessment, flow measurement, monitoring river restoration and maintenance and, the appraisal of human perceptions of riverscapes.

### Key Features:

- A specific focus on management applications in a period of increasing demands on managers to characterize river features and their evolution at different spatial scales
- An integration across all scales of imagery with a clear discussion of both ground based and airborne images
- Includes a wide-range of environmental problems
- Coverage of cutting-edge technology
- Contributions from leading researchers in the field

### **From reader reviews:**

#### **Cody Smith:**

Book is to be different for each grade. Book for children until finally adult are different content. As we know that book is very important for us. The book Fluvial Remote Sensing for Science and Management seemed to be making you to know about other know-how and of course you can take more information. It doesn't matter what advantages for you. The reserve Fluvial Remote Sensing for Science and Management is not only giving you far more new information but also to become your friend when you experience bored. You can spend your own spend time to read your publication. Try to make relationship while using book Fluvial Remote Sensing for Science and Management. You never truly feel lose out for everything if you read some books.

#### **Julie Kappel:**

Many people spending their moment by playing outside with friends, fun activity having family or just watching TV the entire day. You can have new activity to invest your whole day by reading a book. Ugh, you think reading a book will surely hard because you have to bring the book everywhere? It fine you can have the e-book, having everywhere you want in your Touch screen phone. Like Fluvial Remote Sensing for Science and Management which is getting the e-book version. So , why not try out this book? Let's observe.

#### **Catherine Kuntz:**

This Fluvial Remote Sensing for Science and Management is brand-new way for you who has attention to look for some information given it relief your hunger details. Getting deeper you onto it getting knowledge more you know or perhaps you who still having little digest in reading this Fluvial Remote Sensing for Science and Management can be the light food to suit your needs because the information inside this kind of book is easy to get by simply anyone. These books acquire itself in the form that is certainly reachable by anyone, sure I mean in the e-book contact form. People who think that in reserve form make them feel sleepy even dizzy this reserve is the answer. So there is absolutely no in reading a reserve especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the item! Just read this e-book variety for your better life and also knowledge.

#### **Juan Turgeon:**

As we know that book is very important thing to add our know-how for everything. By a e-book we can know everything we want. A book is a set of written, printed, illustrated as well as blank sheet. Every year seemed to be exactly added. This e-book Fluvial Remote Sensing for Science and Management was filled in relation to science. Spend your time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading the book. If you know how big benefit of a book, you can experience enjoy to read a reserve. In the modern era like at this point, many ways to get book that you just wanted.
