**Mathematics, Magic and Mystery (Dover Recreational Math)** Martin Gardner

Why do card tricks work? How can magicians do astonishing feats of mathematics mentally? Why do stage "mind-reading" tricks work? As a rule, we simply accept these tricks and "magic" without recognizing that they are really demonstrations of strict laws based on probability, sets, number theory, topology, and other branches of mathematics.

This is the first book-length study of this fascinating branch of recreational mathematics. Written by one of the foremost experts on mathematical magic, it employs considerable historical data to summarize all previous work in this field. It is also a creative examination of laws and their exemplification, with scores of new tricks, insights, and demonstrations. Dozens of topological tricks are explained, and dozens of manipulation tricks are aligned with mathematical law.

Nontechnical, detailed, and clear, this volume contains 115 sections discussing tricks with cards, dice, coins, etc.; topological tricks with handkerchiefs, cards, etc.; geometrical vanishing effects; demonstrations with pure numbers; and dozens of other topics. You will learn how a Moebius strip works and how a Curry square can "prove" that the whole is not equal to the sum of its parts.

No skill at sleight of hand is needed to perform the more than 500 tricks described because mathematics guarantees their success. Detailed examination of laws and their application permits you to create your own problems and effects.

### **From reader reviews:**

#### **Richard Tipton:**

Have you spare time to get a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a move, shopping, or went to the Mall. How about open or maybe read a book allowed Mathematics, Magic and Mystery (Dover Recreational Math)? Maybe it is to become best activity for you. You realize beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with it has the opinion or you have various other opinion?

#### **Mary McCollum:**

Book is to be different for every grade. Book for children until eventually adult are different content. To be sure that book is very important usually. The book Mathematics, Magic and Mystery (Dover Recreational Math) had been making you to know about other expertise and of course you can take more information. It is quite advantages for you. The e-book Mathematics, Magic and Mystery (Dover Recreational Math) is not only giving you far more new information but also to be your friend when you really feel bored. You can spend your personal spend time to read your publication. Try to make relationship together with the book Mathematics, Magic and Mystery (Dover Recreational Math). You never really feel lose out for everything if you read some books.

#### **Mary Brown:**

In this era which is the greater man or woman or who has ability in doing something more are more valuable than other. Do you want to become considered one of it? It is just simple strategy to have that. What you are related is just spending your time almost no but quite enough to experience a look at some books. On the list of books in the top listing in your reading list is usually Mathematics, Magic and Mystery (Dover Recreational Math). This book and that is qualified as The Hungry Hills can get you closer in growing to be precious person. By looking way up and review this e-book you can get many advantages.

#### **Richard Mason:**

E-book is one of source of understanding. We can add our expertise from it. Not only for students but native or citizen will need book to know the up-date information of year in order to year. As we know those ebooks have many advantages. Beside we all add our knowledge, may also bring us to around the world. Through the book Mathematics, Magic and Mystery (Dover Recreational Math) we can acquire more advantage. Don't you to definitely be creative people? To become creative person must choose to read a book. Just choose the best book that appropriate with your aim. Don't end up being doubt to change your life by this book Mathematics, Magic and Mystery (Dover Recreational Math). You can more desirable than now.
