## **Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) Phillip Judson**

This is currently the only book available on the development of knowledge-based, and related, expert systems in chemistry and toxicology. Written by a pioneer in the field, it shows how computers can work with qualitative information where precise numerical methods are not satisfactory. An underlying theme is the current concern in society about the conflicts between basing decisions on reasoned judgements and wanting precise decisions and measurable effectiveness. As well as explaining how the computer programs work, the book provides insights into how personal and political factors influence scientific progress. The introduction of regulations such as REACH in Europe and modifications to UN and OECD Guidelines on assessment of chemical hazard mean that the use of toxicity prediction is at a turning point. They put a heavy burden on the chemical industry but, for the first time, allow for the use of computer prediction to support or replace in vivo and in vitro experiments. There is increasing recognition among scientists and regulators that qualitative computer methods have much to offer and that in some circumstances they may be more reliable and informative than quantitative methods. This excellent introduction to a field where employment opportunities are growing is aimed at students, scientists and academics with a knowledge of chemistry.

### **From reader reviews:**

#### **Timothy Parker:**

What do you about book? It is not important with you? Or just adding material when you need something to explain what you problem? How about your time? Or are you busy man or woman? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every person has many questions above. The doctor has to answer that question because just their can do that will. It said that about reserve. Book is familiar on every person. Yes, it is correct. Because start from on jardín de infancia until university need this specific Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) to read.

#### **Tara Wilson:**

Are you kind of active person, only have 10 as well as 15 minute in your day time to upgrading your mind proficiency or thinking skill perhaps analytical thinking? Then you are receiving problem with the book as compared to can satisfy your short time to read it because this all time you only find guide that need more time to be examine. Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) can be your answer given it can be read by an individual who have those short extra time problems.

#### **Jared Hoskins:**

Reading a book to become new life style in this 12 months; every people loves to study a book. When you read a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your review, you can read education books, but if you act like you want to entertain yourself look for a fiction books, this kind of us novel, comics, and also soon. The Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) offer you a new experience in reading a book.

#### **Rachel Glidewell:**

Is it you actually who having spare time and then spend it whole day through watching television programs or just lying down on the bed? Do you need something totally new? This Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) can be the solution, oh how comes? The new book you know. You are so out of date, spending your free time by reading in this completely new era is common not a nerd activity. So what these publications have than the others?
